

# SHELVES

Working with the 5" shelf

Endcaps create a tray and provide a finished end for the shelf.

Unique 5" shelf applications

Endcaps are optional. When used the shelf becomes a tray to keep things from falling on the floor.

When drilled the shelf becomes a custom parts caddy. It is an excellent solution for:  
Tools  
Kitchen gadgets  
Machined parts  
Collections

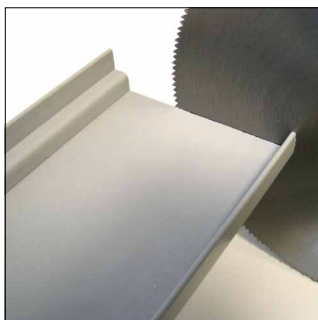

**HD SnapFit™ modular Endcaps for 5" shelf**

Endcaps come in pairs and are 'handed' (one pair = 1 right and 1 left).

**TIP:**  
Endcaps add 1/4" to shelf width.

Collection of golf balls that have scored a hole-in-one.

Cut shelves to length with a conventional saw blade.

Perfect for kitchen and pantry storage.

Drill with conventional twist drill, spade bit or hole saw.
